

Stormwater Mitigation and Coordination

City of Sandy Springs, GA

The Collaborative coordinates the implementation of stormwater best management practices standards in support of the City of Sandy Springs. The firm ensures that all private development within the City meets County, State and Federal standards. Service activities include:

- Municipal Separate Storm Sewer System (MS4) inspections and program management
- Georgia Soil Water Conservation Commission Local Issuing Authority (LIA) compliance and program administration
- Engineering Review

A demographically diverse community, Sandy Springs covers a 38-square-mile area in North Fulton County. It is the second largest city in the metropolitan Atlanta area and is the sixth largest city in the State of Georgia. Sandy Springs is surrounded by more than 950 acres of parks and natural areas. Today, the City enjoys one of the most innovative systems of service delivery in the country, while maintaining a traditional Southern charm and hospitality. The constant, over the years, has been the long-held belief in Sandy Springs as a friendly gathering place. Guests can be assured of a warm Southern welcome when visiting Sandy Springs!
