

## Vision 2020 and Strategic Plan Town of Lexington, MA

The Collaborative designed and facilitated a public engagement process for the purpose of defining a 20-year Vision and Strategic Plan for the Town of Lexington. The final products of this project included an overall Vision for the Lexington of 2020 that outlined a set of specific Vision Statements: (1) topic areas, including physical appearance, governance, economy, sense of community, environment, political well-being, etc., (2) issue areas, defined by the development, analysis, and examination of prominent issues of concern, and (3) implementation areas corresponding to the management structure of the town.

According to Candy McLaughlin, Assistant Town Manager for the Town of Lexington, *“I would like to congratulate and thank the Collaborative for carrying off the community workshops so well. You really hit the ground running.”*
